

Remote sobriety testing has never been this **EASY!**

Soberlink in the News :

SOBERLINK is the most practical and convenient alcohol monitoring device available today. SoberLink Mobile includes a customized smartphone that enables you to send a sobriety report wirelessly, in real-time. This evidence-based data grants unprecedented access to a subject's alcohol abstinence from any location.

While the participant performs a breath test, an internal camera takes his picture to confirm identity.

The data is wirelessly transmitted to cloud storage on the monitoring web portal.

Monitoring Web Portal

SOBERLINK'S web portal stores an unlimited amount of sobriety reports accessed through a password protected account. Real time alerts for positive or missed reports allow the supervisor to take immediate action with the client and reduce time spent in front of a monitor.

Key Benefits

- Detailed Reports: BAC, client photograph, GPS location, and time of report.
- Automatic text reminders to client when reports are due .
- Real time alerts for missed or positive BAC reports.
- Report management tools.

Within seconds, the supervising party will have password protected access to the sobriety report and receive real-time alerts for violations.
