Advocate

Victim Notification and Tracking Application

Convenient, Discreet and Confidential

Combining a Victim's smartphone with the advanced tracking capabilities of Sentinel's OM500 GPS device, Advocate allows law enforcement and corrections agencies to track and compare location data of participants and Victims of domestic violence simultaneously through Sentinel's propietary DNA monitoring system.

Available for iPhone and Android devices, Advocate discreetly tracks the Victim's smartphone and updates SentinelDNA with location data to create a Mobile Exclusion Zone. This Mobile Exclusion Zone repositions within SentinelDNA as the Victim's smartphone moves throughout the community. Should the participant approach within a preset distance of the Victim's smartphone, notification is sent to the Victim and law enforcement authorities.
